MAHINDRA BS6 AFTER TREATMENT SYSTEM. LOWER AdBlue CONSUMPTION MEANS HIGHER EARNINGS.

The journey from BS4 to BS6 is not just about a technological change but to change people's mindset of doing business in the transport industry.

All of this enabled Mahindra Truck and Bus to make minimal changes to its vehicles because they were already BS6 ready at the BS4 stage with 90% of the parts being same. This benefits our customers as they don't need to worry about availability of spare parts and after sales services.

The Mahindra BLAZO X is not only built for profits but also for savings. Its AdBlue consumption is lower. That means fewer trips for refilling and lower AdBlue expenses. And what does this mean for your transport business? Increased earnings of course.

This engine, in combination with the multi-mode switches, delivers uncompromising performance. Giving mileage without short changing you when you need power, pickup or pulling ability.
